

FINE FLUXER 3000+

For repairs and subsequent mounting of SMD components

DESCRIPTION

A new user-friendly method for precise application of flux in areas which are narrow or difficult to access. Ideal for repairs and subsequent mounting of SMD components on tightly assembled boards and ceramic substrates. Ideal for repairs and subsequent mounting of SMD components on tightly assembled boards and ceramic substrates.

The advantage of Stannol Fine Fluxer 3000+ is the quality of the tip and the high outline stability of the especially developed flux. This allows the precise dosage of flux and it avoids spreading as with conventional flux pens.

Stannol 3000+ is a no-clean flux type conforming to REL1 according to EN 61190-1-1 and J-STD-004. The activation of the Stannol 3000+ flux provides good wetting also with lead-free alloys.

The residues are clear and after the soldering hard and dry. They can be removed with our cleaner Stannol Flux-Ex 500 if required.

CHARACTERISTICS

This product offers the following advantages:

- precise application because of special tip
- excellent wetting with lead-free alloys
- outstanding outline stability
- easy to use, even in difficult areas fast wetting
- no-clean application, electrically safe

APPLICATION

The Fine Fluxer pen has a plastic shank. With only low pressure you can apply a precisely controlled amount of flux onto the surface.

TECHNICAL DATA

GENERAL PROPERTIES	FINE FLUXER 3000+
Capacity:	8 ml
Length, applicator:	18 cm
Length, tip:	12 mm

PHYSICAL PROPERTIES AND DATA

ALLGEMEINE EIGENSCHAFTEN	FINE FLUXER 3000+
Colour:	light-yellow
Density at (20° C):	0.927 g/cm ³
Solid content:	29.7 %
Acid rating:	21 mg KOH/g
Copper mirror test:	passed
Silver chromate paper test:	passed
Surface Insulation Resistance:	>10 ⁸ Ω
Corrosion:	none

SHELF LIFE

2 years (provided proper storage, unopened).

HEALTH AND SAFETY

Before using please read the material safety data sheet carefully and observe the safety precautions described.

NOTE

The above values are typical and represent no form of specification. The Data Sheet serves for information purposes. Any verbal or written advise is not binding for the company, whether such information originates from the company offices or from a sales representative.
